USER MANUAL

OPERATION:

The EcoSphere O3 operates in both wired and wireless modes, offering versatile functionality.

- 1.To activate the unit, press the power button once. A single beep from the buzzer, illumination of the green LED, and entry into "Normal Mode" signify that the unit will operate for 30 minutes every 6 hours.
- 2.For continuous operation in "Enhanced Mode," press the power button again. A single beep from the buzzer and the illumination of the red LED indicate that the unit will operate continuously.
- 3.To power off the unit, press the power button once more.

PRODUCT DIAGRAMS:

THE ECOSPHERE O3 BY LT&B OFFERS A RANGE OF BENEFITS AND FEATURES:

Benefits:

Air Purification: Generates high-energy electrons (negative ions) and active particles (active oxygen) for air disinfection, sterilization, and deodorization.

Freshness Preservation: Releases surplus negative ions to extend the freshness of vegetables and food when used in a refrigerator.

Safety: The active oxygen decomposes into safe, pollution-free oxygen after a period, ensuring safety.

High Sterilization Rate: Effectively kills various bacteria in small spaces, achieving a sterilization rate of over 98%.

Features:

Zero Maintenance: Requires no ongoing maintenance efforts.

Lightweight: Designed to be easily portable due to its light weight.

Quiet Operation: Operates quietly for minimal disruption.

Compact Design: Space-efficient and suitable for various environments.

Easy One-Button Operation: Simple and user-friendly operation with a single button.

Scope of Applications: Ideal for use in refrigerators, closets, cabinets, bookcases, automobiles, and other compact spaces requiring sanitation and odor removal.

These features and benefits make the EcoSphere O³ a convenient and effective solution for air purification and freshness preservation in various settings.

SPECIFICATIONS AND PARAMETERS:

Model Name: EcoSphere O³

Dimensions: 89 x 33mm

Net Weight: 110g

Input Voltage: DC3.7V

Built-in rechargeable lithium-ion battery: 1200mAh

Power Consumption: 0.3W

Effective Purification Area: up to 105 ft³ (3m³)

Ionizer Output: Min. 10 million/cm³

Warranty: 1-year
